Scherrer Construction Company Inc.
601 Black Hawk Rd
Burlington, WI 53105

Subject: Invoice for electric service installation at 4324 Carol Rd - V/Caledonia

Dear Scherrer Construction Company Inc.:

Thank you for applying for electric service installation at the address listed above. Your next steps are:

1. Verify installation information

Class: Underground
Size: 400A
Voltage: 480Y/277V

Call me as soon as possible if the information above is incorrect.

2. Review costs

- Your electric service installation cost of \$3,056.97 is valid for 90 days from the date of this letter.
- Cost includes seasonal charges of \$60.00 for installation from Dec. 1 through March 31.
- Additional charges may apply if unusual or unforeseen conditions are encountered during your service installation or if installation exceeds standard service length.
- The excavated area will be backfilled with existing soil at no cost to you. Surface restoration in the public right-of-way will be completed according to municipal guidelines. Additional restoration work required to satisfy state or municipal erosion control permit requirements or that you may have requested is included in your installation cost.
- If erosion control is required and charges apply, they have been included in your installation cost.
- Additional charges may apply if you request another quote within 12 months.

3. Verify other details

- Ensure your electrician installs the meter pedestal closest to our facilities, avoiding locations where a deck, patio or other construction is planned. A meter pedestal location change may result in additional cost.
- Ensure that buried facilities (septic lines, electric lines, fencing, drain tiles, etc.) and any planned structures (pools, outbuildings, decks, patios, etc.) have been located and marked on the site and enclosed sketch. We are not responsible for damage to unmarked private facilities.
- Remove obstacles (dumpsters, debris piles, brush, etc.) so we can access your site.
- Provide a copy of this letter to your electrical contractor. Note that your municipal inspection has not been received. Please also verify that your electrical contractor has requested the municipal inspection.
- Ensure access to meter(s). If located in a locked area, provide a key and suitable location for us to install a locked key box.
- Ensure your electrician properly marks multiple meter sockets (if applicable) so the sockets show the unit each one feeds.

4. Remit payment, if applicable, using one of the following options. Reference the work request number shown below on your check or when paying via phone or online.

- Personal check.
- Online by visiting www.we-energies.com/payconstructionbill.
- By phone at 855-570-0998.

5. Sign and return the following in the enclosed envelope:

- The drawing included with this letter.
- A copy of this letter.
- Payment if using personal check.

6. Send or fax the electric ready for service card.

- Your site is ready for service when all requirements on the ready for service card are met. Do not return this card until the site is ready and items outlined in this letter are completed.
- If a site ready card is not enclosed, the card has been mailed to your builder/contractor.

Note: All electrical service equipment must be installed in compliance with the state of Wisconsin electrical code and the We Energies electric service and metering manual. Visit www.we-energies.com/contractors for a copy of our metering manual.

If you have questions, please call me. I look forward to working with you to make your project a success.

Sincerely,

Tiara Joyner, Service Manager
